

What Black-Holes ^{C-R} Think When They Read Conventional Science Theories

...and then, these Earth scientists believe that all of our matter collapses into a space that's so small it almost doesn't exist!!

I'm glad we don't have to act like their book says. That would be no fun at all!!

Fortunately for Black-Holes ^{C-R}, they don't have to do what Earth's Physics books say they do.

OOoh!! Yeah!! I really like the C-R theory. I think it's much closer to my true lifestyle.
